

PRODUCT SPECIFICATION

Kaolin Light BP07

Kaolin Light is a native hydrated aluminium silicate, freed from most of its natural impurities, dried and milled to a fine powder. It contains a suitable dispersing agent and is test for both the chemical and physical properties in the manner defined by the specification of the British Pharmacopoeia 2007.

ITEM	SPECIFICATION
Description	A light, free-flowing, silky white powder
Solubility	Practically insoluble in water and in mineral acids
Identification	A native hydrated aluminium silicate
Loss on Drying	1.5% max
Loss on Ignition	15.0%
Coarse particles	25 mg
Fine Particles	70% min
Chloride	330 ppm
Soluble Matter	10 mg
Arsenic	2 ppm
Heavy Metals	20 ppm

Packing: 20kg net bags, 960kgs per pallet
